Team Control Number		Problem Chosen
0000000		**C**

Summary Sheet

Your Paper Title Here

Write your summary here (one page maximum). Suggested structure:

- Problem context and restatement (1–2 sentences).
- Modeling approach and key techniques.
- Quantitative results with numbers.
- Concluding statement.

Keywords: keyword1; keyword2; keyword3; keyword4; keyword5

Do not include school names, member names, or advisor names on this page.

Contents

1 Introduction

1.1 Problem Background

Briefly introduce the context and motivation of the problem.

1.2 Restatement of the Problem

Restate the problem in your own words. Break it into specific tasks:

Task 1: Describe the first task.
Task 2: Describe the second task.
Task 3: Describe the third task.

1.3 Our Work

Summarize your overall approach and contributions in one or two paragraphs.

2 Assumptions and Justifications

A1 Assumption 1: Description and justification.
A2 Assumption 2: Description and justification.
A3 Assumption 3: Description and justification.

3 Notation

Symbol	**Definition**	**Unit**
x_i	Description	—
y	Description	—

4 Models

4.1 Model for Task 1

4.1.1 Modeling Approach

4.1.2 Mathematical Formulation

Workflow overview

Place fig_workflow_demo.png in the figures/ directory

Figure 1 Workflow overview

4.1.3 Solution Algorithm

4.2 Model for Task 2

4.2.1 Modeling Approach

4.2.2 Mathematical Formulation

4.2.3 Solution Algorithm

5 Results and Analysis

5.1 Results for Task 1

5.2 Results for Task 2

6 Sensitivity Analysis

Describe how key parameters affect model outputs.

7 Model Validation

Compare model predictions with benchmarks or hold-out data.

8 Strengths and Weaknesses

8.1 Strengths

8.2 Weaknesses

8.3 Future Work

9 Conclusion

Summarize contributions, limitations, and practical implications.

A Code Listing

Listing 1 Example script

```
import pandas as pd

df = pd.read_csv("data.csv")
print(df.describe())
```
